		* **Pensamiento crítico:** Al resolver problemas sencillos en los juegos. * **Alfabetización digital:** Mediante el uso de herramientas TIC.	
Rationale (Justificación) WHY 300 –words text (Un texto corto de 300 palabras) Aprender inglés desde pequeños es una oportunidad para que los niños y niñas tengan otras formas de comunicarse y mirar el mundo. En el grado pre jardín, ellos aprenden más jugando, preguntando y explorando, por eso se pensó en usar el cuento The Little Hummingbird. Es una historia corta y sencilla que ayuda a llamar su atención y, al mismo tiempo, les acerca a nuevas palabras en otro idioma. El colibrí se escogió porque es un animal que ellos pueden reconocer, además de que tiene colores llamativos, es pequeño y vuela rápido. Eso hace que los niños se interesen más fácil, que lo recuerden y que puedan relacionar lo que ven en la historia con cosas de su entorno, como las flores o los colores. La idea no es solamente que repitan vocabulario, sino que vivan el idioma como una experiencia. Cuando cantan, juegan a volar como el colibrí o nombran los colores, están usando palabras nuevas pero también el cuerpo, la voz y la imaginación. Por eso, el cuento The Little Hummingbird se justifica como un recurso valioso: no se trata solo de enseñar inglés, sino de hacerlo de una manera alegre, cercana y significativa para los niños.

Methodology (Metodología)/ See Suggested English Curriculum pages 16-19)

How: 300- words text

The methodology of this unit is designed to respond to the characteristics of Pre-Kindergarten children, who learn mainly through play, movement, and imagination. The goal is for English to become a familiar and meaningful experience, where students feel motivated to participate, explore, and enjoy themselves while discovering new words and expressions.

The common thread of the unit will be the story “The Little Hummingbird,” a simple story about a hummingbird and garden animals.

A central strategy will be Total Physical Response (TPR), in which children learn through action. Simple commands in English will be used, which students will represent with body movements. Thus, when hearing expressions such as “fly like a hummingbird,” children will imitate the fluttering of a hummingbird, connecting vocabulary with bodily experience. This technique facilitates word retention and takes advantage of the natural need for movement at this age.

Digital resources such as short holograms about hummingbirds and Jcllic with simple interactive games will also be integrated. These materials will support attention and allow for dynamic reinforcement of what has been learned. At the same time, creative and artistic activities will be carried out.

Finally, collaborative work will play an important role. Through games and activities in small groups, children will learn to share, communicate, and help each other. This will allow them not only to practice English, but also to strengthen their social skills in an environment of trust and cooperation.

DIDACTIC SEQUENCE

Lesson Plan No 2 T The Garden Helpers	Date : October 27th	Time allocated (Tiempo asignado): 1 hour	Students Prior Knowledge (Conocimiento previo de los estudiantes necesario para esta sesión) * They recognize common animals such as bee, butterfly, and birds (hummingbird) in Spanish. * They have been exposed to some English words such as hello and bye. * They know how to color and use basic materials (colors, scissors, glue).
Teacher’s purposes (English and ICT) (propositus del professor para inglés y TIC en esta session) * Introduce vocabulary related to hummingbirds and their environment. * Motivate children to participate in English through songs, gestures, and games. * Integrate an ICT resource (homemade hologram) to spark curiosity and reinforce learning.	Specific learning objectives of the learners (English and ICT) (Objetivos específicos de aprendizaje para el estudiante en inglés y en ICT / qué van a aprender y hacer en inglés y ICT en esta sesión) * Identify and repeat new words: hummingbird, wings, flower, colors. * Follow simple instructions in English while performing manual and movement activities. * Recognize the use of technology (hologram) as a means to learn and be surprised by the topic.		
Language Structure Focus (Estructura grammatica.l) * “This is a hummingbird.” * “It has shiny wings.” * “Flap your wings!” Specific lexical items for this session (el léxico específicos para esta sesión : * Nouns: hummingbird, bee, butterfly, flower, pollen. * Verbs: fly, look,helps, grow. * Adjectives: little,together, color.		Promotion of Communicative Skills (Promoción de las competencias comunicativas: Cuáles serán promovidas principalmente y qué situaciones en esta sesión, cómo se evidenciará que se están desarrollando) Listening (escuchar) listening to the song, instructions, and reading aloud. Monologue (monólogo) repeating short phrases such as “This is a hummingbird.” Conversation (conversación) answering simple questions such as “What color is it?” or “Do you like it?”

Some classroom expressions (commands, instructions used by the teachers / Expresiones que seran usadas por el maestro o la maestra en formación) * “Hello, little hummingbirds!” * “Flap your wings!” * “Sit down, please.” * “Look at the picture.” * “Good job!”		“what is doing?”
Classroom organization Then we will ask the students to sit down so we can read them the part of the story that explains how hummingbirds, along with butterflies and bees, help flowers grow. Next, we will show them the holograms of the bee and the butterfly, as well as the related comic. Afterwards, we will give the instructions for the activity and go out to the courtyard to carry it out.	Anticipated Problems (Problemas anticipados) / Siempre es conveniente prever dificultades	Possible Solutions (Posibles soluciones) / tener las soluciones listas para solucionar las dificultades Plan A/B...
	* Children may become distracted or lose interest quickly. * Some may not understand the instructions in English. *Damage to activity materials	* Use gestures, mimicry, and repetition to aid comprehension. * Prepare extra material for the activities * Alternate quiet activities with dynamic activities (moving like hummingbirds).

Stage (fase)	Description of the Activity (Descripción de las actividades) (Enumerar en secuencia y dar nombre a cada actividad en cada uno de los momentos de la clase, esto permite distribuir ROLES entre los maestros participantes)	Time (tiempo)	Resources	
			Tools and classroom items and supplies (herramientas y recursos de clase)	Teaching Materials (Materiales de enseñanza / videos / songs /story...)
BEGINNING To engage the students (Inicio)	Initial Activities 1. Activity – “Singing with the Hummingbird” The children learn and sing our song about the hummingbird's greeting. The verses are accompanied by movements (flying, flapping wings). Key words are introduced: bee, butterfly, hummingbird, flower, nectar, pollen. 2. Activity – “Story Time: Bees, Butterflies, and Flowers” The part of the story that explains how bees, butterflies, and hummingbirds help flowers is reread. Pauses are made to ask in English: “What do they carry?” 3. Activity – “Magic Holograms” (Observing insects and birds) The holograms of the bee and the butterfly are shown. 4. Activity – “Comic Time: Let's Explain Pollination!” (The explanatory comic) The comic created by the group is presented, explaining pollination step by step.	15 min		-Book Song Hologram comic

	Simple phrases are repeated in English: “Bees carry pollen.” / “Butterflies drink nectar.” Translated with DeepL.com (free version)			
MIDDLE Main topic (tópico principal) (Intermedia)	5. Activity – “Pollination in Action” (Outdoor hands-on experience) Flowers made out of cardboard are placed in the yard. Each flower has a small cap with a little water (nectar) and frost (pollen). The children, in groups, receive a stick with a bee, butterfly, or hummingbird made out of pipe cleaners. They must visit several flowers, touch the nectar and pollen, showing how it is transferred from one flower to another. At the end, they observe how the “pollen” has mixed among the flowers.	30 min	Flowers made out of cardboard or cardstock Small plastic caps (from bottles) to simulate nectar. Water Glitter Bees, butterflies, and hummingbirds made out of pipe cleaners Wooden sticks or long skewers Glue, scissors, and adhesive tape Tray or container to prepare the “nectar” and “pollen” mixture

	The children say short sentences.			
Formative assessment And summative assessment (Evaluación formativa y sumativa)				
	Assessment as learning (evaluación como aprendizaje) / Determinar qué actividades nos dan cuenta del aprendizaje de los niños * Children recognize that bees, butterflies, and hummingbirds play an important role in helping flowers grow through pollination. They use and identify key English words such as bee, butterfly, hummingbird, flower, nectar, and pollen, demonstrating understanding of the vocabulary introduced. They actively participate in the different activities—songs, story reading, hologram observation, comic presentation, and the outdoor pollination game—showing interest, attention, and motivation to learn. They understand in a practical way how pollen is transferred from one flower to another and collaborate with their classmates during group tasks. Finally, they express simple ideas about what they learned, through words or gestures, responding to English questions related to the pollination process.			
	Assessment of learning (evaluación del aprendizaje / evidencias del aprendizaje) * Evidence: During the activities, children sing and imitate the hummingbird’s movements, respond to questions such as

	“Who helps the flowers?” or “What do bees carry?”, and confidently repeat the English words with enthusiasm. In the hands-on pollination experience, they correctly manipulate the materials, visit several flowers with their pipe-cleaner insects, and demonstrate how the “pollen” is transferred from one flower to another. They also participate in the games by following instructions in English and cooperate respectfully with one another. In the final reflection, students express in their own words or through gestures what they understood about the importance of bees, butterflies, and hummingbirds for flowers, thus showing clear evidence of meaningful learning.
